FOREWORD

I am delighted to introduce this publication *Looking at Our School 2016: A Quality Framework for Post-Primary Schools*. It is designed to support the efforts of teachers and school leaders, as well as the school system more generally, to strive for excellence in our schools.

We are very fortunate in Ireland to have an education system that is held in high regard by parents, students, teachers and the wider community. Surveys and questionnaires among parents, learners, employers and others provide evidence of that high regard and indicate very high levels of confidence that our schools are well run. Irish students perform well in international surveys of achievement and school inspection reports show the extent to which high-quality teaching and learning is characteristic of our schools.

Teachers, parents, students and all stakeholders can justifiably be proud of our schools and of the ongoing work by teachers and others to make learning experiences for all students relevant, challenging and imaginative. The Government is committed to supporting this work. We are determined to invest the benefits of economic growth in our education system so that we can continue to have excellent teaching and learning for all learners in our schools.

As Minister for Education and Skills, I am very conscious that maintaining and improving the quality of learning in schools is a constant challenge in a rapidly changing world. Teachers have to be at the heart of any effort to improve learning and it's widely accepted that where schools reflect on the quality of their work and plan for how it can be improved, students learn better. That's why having good self-evaluation in schools is so important – it can encourage schools to find new creative and effective solutions to improve the learning of their students. School self-evaluation also compliments the external inspections carried out by the Department's Inspectorate and together, they can keep parents informed and reassured about the standards of learning in schools.

Looking at Our School 2016: A Quality Framework for Post-Primary Schools is designed to underpin both school self-evaluation and school inspections. The idea of a quality framework in any area is to provide standards that can help us to assess how good practice is and, very importantly, to point the way towards improvement where needed.

Looking at Our School 2016: A Quality framework for Post-Primary Schools is designed to give a clear picture of what good or very good practices in a school look like. It will allow schools to look at their own practices and to identify what they are doing well, and what aspects of the school's work could be further developed to improve students' learning experiences and outcomes. The framework is built around the areas of teaching and learning, and leadership and management. These are the two key areas of the work of a school that directly impact on students' learning outcomes and experiences. *Looking at Our School 2016* will also be used by inspectors when evaluating schools, and it will help parents and others to understand how well schools are working and how well students are learning.

Looking at Our School 2016: A Quality Framework for Post-Primary Schools has been written following extensive consultation with students, teachers, parents, school leaders, management bodies and other education professionals and a wide range of other bodies. I want to thank all of the individuals and bodies involved for the way in which they have collaborated with the Inspectorate of the Department in this work and I wish all involved in using the framework every success in their efforts to improve and develop learning in Irish schools.

Richard Bruton, TD, Minister for Education and Skills

INTRODUCTION

1. Purpose and rationale

In 2003, the Inspectorate published a guide to self-evaluation for schools called *Looking at Our School*. *Looking at Our School 2016: A Quality Framework for Post-Primary Schools* replaces the 2003 publication and is intended to fulfil a number of purposes.

Looking at Our School 2016: A Quality Framework for Post-Primary Schools provides a unified and coherent set of standards for two dimensions of the work of schools:

- teaching and learning
- leadership and management

It is designed for teachers and for school leaders to use in implementing the most effective and engaging teaching and learning approaches and in enhancing the quality of leadership in their schools. Through the provision of a set of standards describing 'effective practice' and 'highly effective practice', the framework will help schools to identify their strengths and areas for development and will enable them to take ownership of their own development and improvement. In this way, the quality framework seeks to assist schools to embed self-evaluation, reflective practice and responsiveness to the needs of learners in their classrooms and other learning settings.

The quality framework will be used to inform the work of inspectors as they monitor and report on quality in schools. Evaluation models will draw on the elements of the framework that are most relevant to the focus of the model. In this way, while the framework will be used flexibly, it will ensure consistency in Inspectorate evaluations.

Making the quality framework publicly available will help parents and others to understand the evaluative judgements in inspection reports. The common language provided by the framework will facilitate meaningful dialogue between teachers, educational professionals, parents, students, school communities and the wider community about quality in our schools.

2. Principles of the Quality Framework

The quality framework takes a holistic view of learning and of the learner. It emphasises the need for students to develop a broad range of skills, competences and values that enable personal well-being, active citizenship and lifelong learning. Learning experiences for all students should therefore be broad, balanced, challenging and responsive to individual needs.

The quality framework sees students' well-being as intrinsic to this holistic view of learning, both as an outcome of learning and as an enabler of learning. It recognises the crucial role of schools in promoting and nurturing students' well-being through their practices in the key areas of school environment, curriculum, policies, and partnerships. Support for students' well-being is therefore integrated into the two dimensions of this framework, and is explicitly referenced at key points.

The quality framework recognises the importance of quality teaching and draws on a wide body of research that suggests that excellence in teaching is the most powerful influence on student achievement. It acknowledges the pedagogical skills required to enable high-quality learner experiences and outcomes.

It views career-long professional development as central to the teacher's work and firmly situates reflection and collaboration at its heart. The framework holds that improving the quality of students' learning should be the main driver of teacher learning.

The quality framework views schools as dynamic learning organisations, where teachers are enabled to work individually and collectively to build their professional capacity in order to support continuous improvement in teaching and learning. It holds that schools should assume responsibility for the quality of the education they provide and should be explicitly learner-centred. It views students as active agents in their learning who engage purposefully in a wide range of learning activities and who respond in a variety of ways to different learning opportunities.

The quality framework sees external and internal evaluation as complementary contributors to school improvement and capacity building. It maintains that the most powerful agent of improvement is a well-integrated system of evaluation that combines the external perspective with the reflective and collective insights of school leaders, teachers, parents and students.

The quality framework sees leadership and management as inseparable. The framework defines school leadership by its impact on learning. It sees leadership that is focused on creating and sustaining environments that are conducive to good learning as paramount and acknowledges that effective leadership is essential for schools to be places where successful learning happens. It is a fundamental principle of the framework that, for schools to be led effectively, they must be managed effectively. Therefore both leadership and management skillsets are considered at all times as serving the school's core work: learning and teaching.

The quality framework refers generally to school leaders, and more specifically to school patrons, boards of management, principals and deputy principals, as appropriate. The term 'school leaders' typically refers to these formal leadership roles, and also includes teachers with posts of responsibility and those who have undertaken roles related to the school's priorities. The framework also recognises that all teachers play a leadership role within the school. The leadership and management dimension is therefore intended to assist all teachers in gaining a perspective on their own leadership roles in the school and how they can develop and expand their leadership skills over time.

3. The structure and application of the Quality Framework

I. OVERVIEW

There are two **dimensions** in the framework – Teaching and Learning, and Leadership and Management. These represent the two key areas of the work of a school.

Each of the dimensions is divided into a number of domains. The **domains** represent the distinct, although interrelated, aspects of the dimension.

Standards are then provided for each of the domains. The standards are stated as the behaviours and attributes characteristic of practices in an effective, well-functioning school.

The overview of the Quality Framework on page 12 shows the two dimensions, the domains into which they divide, and the standards for each domain, in a concise one-page format.

II. THE STATEMENTS OF PRACTICE

For each standard, **statements of practice** are given at two levels – statements of effective practice and statements of highly effective practice. The statements of effective practice describe practices operating at a competent and effective level. The statements of highly effective practice describe very effective and successful practices. The statements at the two levels differ in varying ways; some explanations and examples are given below.

In some cases the statement of highly effective practice is different in degree from the statement of effective practice. For example, at the level of effective practice ‘students demonstrate high levels of interest and participation in learning’, whereas highly effective practice describes students as demonstrating ‘**very high** levels of interest and participation in learning’. This is a familiar form of differentiation and, for this reason, is used wherever appropriate.

In other cases the statement of highly effective practice develops and extends the statement of effective practice. For example at the level of effective practice students ‘have the skills to modify and adapt their behaviour when required’ while at the level of highly effective practice students ‘have the skills to modify and adapt their behaviour when required, **and recognise the need to do so themselves.**’ This form of differentiation is used where effective practice has the potential to be further developed so that it leads to a more valuable outcome. Schools can use these statements as a guide when seeking to build on and improve existing effective practices.

Finally, in a small number of cases the statement of highly effective practice is the same as the statement of effective practice: for example ‘students’ achievement in summative assessments, including certificate examinations, is in line with or above realistic expectations.’ This is because, for these particular aspects of a school’s provision, there is no meaningful difference between effective and highly effective practice.

The key characteristics that distinguish highly effective practice from effective practice are written in bold type in the statements of highly effective practice.

III. USING THE STATEMENTS OF PRACTICE IN THE EVALUATION PROCESS

Taken together, the statements of effective practice and highly effective practice should enable teachers, school leaders, and others involved in internal or external evaluation to arrive at evidence-based evaluative judgements about the quality of aspects of a school’s provision. The statements of practice should also enable teachers and school leaders to plan the next stage in the improvement journey for their own teaching or for their school’s provision.

The quality framework recognises that schools are at different stages of the school improvement journey for different aspects of their provision. Thus a typical school might have some very good practice, for

example, in the area of learner experiences or relationships with parents. And the same school might have aspects, for example learning outcomes in particular subjects or assessment practices, which require improvement.

An important function of these standards is to assist schools in identifying the areas of their practice that are effective or highly effective, to identify and prioritise the areas where improvement is needed, and to help them chart the improvement journey.

For example, a school may decide to focus on the area of differentiation within the domain of teachers' individual practice. The relevant statements of effective practice and highly effective practice are:

STANDARD	STATEMENTS OF EFFECTIVE PRACTICE	STATEMENTS OF HIGHLY EFFECTIVE PRACTICE
<i>The teacher selects and uses teaching approaches appropriate to the learning intention and to students' learning needs</i>	Teachers meaningfully differentiate content and activities in order to cater for the varying needs and abilities of students.	Teachers meaningfully differentiate content and activities in order to ensure that all students are challenged by the learning activities and experience success as learners.

Once the process of gathering and considering evidence is completed, the statement of effective practice can be used by the school to identify aspects of their practice that correspond to it. The school may also identify some aspects of practice that are more closely aligned to the highly effective practice and, perhaps, aspects where practice is less than effective. Both the statement of effective practice and the statement of highly effective practice will also help identify specific areas that teachers should focus on in order to bring about and sustain improvements. These may include *meaningful differentiation* or ensuring that *all learners experience success and challenges* in their learning.

Similarly a school community that is looking at the relationship between the board, principal and parents' association could use the following statements of effective practice and statements of highly effective practice:

STANDARD	STATEMENTS OF EFFECTIVE PRACTICE	STATEMENTS OF HIGHLY EFFECTIVE PRACTICE
<i>Build and maintain relationships with parents, with other schools, and with the wider community</i>	The board of management and principal facilitate and support the parents' association to fulfil its partnership and advisory role.	The board of management and principal facilitate and support the parents' association to fulfil its partnership and advisory role, and to operate as an inclusive forum, supporting the involvement of all parents.

The statement of effective practice will assist the school in making a judgement about whether or not the board and principal enjoy an effective relationship with the parents' association. If it decides that its practice in this area is less than effective and prioritises it as an area for improvement, then the emphasis on the *facilitation and support* of the board and principal and on the *partnership and advisory* role of the parents' association will help the school to identify areas that they should focus on in order to bring about improvements. For schools that judge their practice in this area to be effective, the statement of highly effective practice, with its emphasis on *an inclusive forum for all parents*, will assist them in bringing about and sustaining further improvements.

4. A comprehensive framework to be used selectively

The quality framework provides a comprehensive picture of quality teaching and learning and quality leadership and management. It is designed to provide the widest possible scope to teachers, school leaders and others to identify and achieve excellence in teaching and learning and leadership and management. However all aspects of the framework should not be included in any one self-reflective or evaluative activity. School principals, in particular, should view the framework as an enabler of self-reflection and improvement and not as an inflexible check-list. In summary, the framework allows for selection of what is most relevant to suit the specific purpose of individual teachers or schools.

For example, an individual teacher who wishes to reflect on and improve an aspect of his / her teaching may focus on one or two standards within the domain of teachers' practice in the teaching and learning dimension. A school team who are leading the process of school self-evaluation of teaching and learning within the school may select one or more domains of the teaching and learning dimension as the focus of their work.

School context will also be a factor in determining the detail of engagement with the framework. All the domains and almost all of the standards are applicable to all schools, regardless of context. However at the level of statements of practice, specific school contexts will determine which statements of practice can be used meaningfully. For example, in the leadership and management dimension, it is not useful for school leaders in small schools to evaluate their practice using statements that refer to extensive leadership teams. Therefore, schools will use each of the domains and standards to reflect on key areas, but will have considerable flexibility in deciding which statements to focus on in evaluating and describing their level of proficiency.

At all times, the emphasis should be on the relevance of the statement to the school and its usefulness in bringing about school improvement.

5. The Quality Framework - a range of applications

This framework has been developed to support a wide range of partners across the system. Some of the key uses of the framework are indicated below.

REFLECTION

A key element in the behaviour of effective teachers and leaders is the ability to reflect on their practice and improve as a result. This may involve self-reflection where professionals question their actions and examine the impact of those actions as a way of improving both. It may also involve structured reflection with others in seeking to enhance teaching and learning and leadership in their school. The framework can be used:

- as a tool for teachers' and leaders' self-reflection and as a support in the development of their own teaching and leadership capacity
- to provide a structure for peer-reflection within schools and also between teachers and leaders in different schools
- as a talking point to generate discussion and analysis of teaching and learning and leadership within the school community
- as a planning tool for teachers, for leaders and those aspiring to leadership positions for their own professional development

DEVELOPING AND SUSTAINING TEACHERS AND LEADERS

Individual schools, and the wider education system, have considerable interest in developing and sustaining teachers and the current and next generations of school leaders. The framework provides a structure through which:

- key stages in the development of teachers and leaders can be mapped out at school and system level
- schools and the system can gauge the appropriate supports and experiences needed in advancing the skillset of teachers, leaders and potential leaders
- experienced teachers and leaders can provide advice and guidance for new and emerging teachers and leaders within schools and in the wider education system

RECRUITMENT

The recruitment of teachers, principals and other school leaders is one of the most challenging tasks that patrons/trustees, boards of management and school principals face. Their decisions have the potential for long-term impact on teaching and learning in their schools. The framework provides support in this endeavour by:

- highlighting the skillsets and elements of good practice which are central to good teaching and learning and good leadership
- facilitating clarity and consistency in any consideration of candidates across sectors, patron/trustee bodies and boards of management
- ensuring potential teaching and leadership candidates, and those recruiting candidates, have a clear understanding of the responsibilities of teachers and school leaders

PROFESSIONAL DEVELOPMENT ACROSS THE SYSTEM

Support for teachers and school leaders is currently offered by a wide range of bodies including Department support services, third-level institutions, professional associations, and management and patron/trustee bodies. It is important that a common understanding of high-quality teaching and learning and of leadership permeates all of these. The framework will support these bodies in:

- developing professional development programmes and courses with a consistent view of what makes for high-quality teaching and learning and leadership
- evaluating the strengths of current programmes and courses, and exploring opportunities for further development
- considering demands from teachers and from current and aspiring school leaders in the context of current challenges

TRANSPARENCY, ACCOUNTABILITY AND IMPROVEMENT

Throughout the system there is a need for great clarity regarding what happens when teaching, learning and leadership are working well. This framework provides::

- clarity regarding what effective teaching and learning and effective leadership looks like
- consistency in appraising strengths and a means of identifying areas for development
- a transparent guide to support teachers and leaders in being accountable to their communities
- a personal roadmap towards improvement

Table 1: Quality Framework for Post-Primary Schools-Overview

	DOMAINS	STANDARDS
TEACHING AND LEARNING	Learner outcomes	Students: enjoy their learning, are motivated to learn, and expect to achieve as learners have the necessary knowledge and skills to understand themselves and their relationships demonstrate the knowledge, skills and understanding required by the post-primary curriculum attain the stated learning outcomes for each subject, course and programme
	Learner experiences	Students: engage purposefully in meaningful learning activities grow as learners through respectful interactions and experiences that are challenging and supportive reflect on their progress as learners and develop a sense of ownership of and responsibility for their learning experience opportunities to develop the skills and attitudes necessary for lifelong learning
	Teachers' individual practice	The teacher: has the requisite subject knowledge, pedagogical knowledge and classroom management skills selects and uses planning, preparation and assessment practices that progress students' learning selects and uses teaching approaches appropriate to the learning intention and the students' learning needs responds to individual learning needs and differentiates teaching and learning activities as necessary
	Teachers' collective / collaborative practice	Teachers: value and engage in professional development and professional collaboration work together to devise learning opportunities for students across and beyond the curriculum collectively develop and implement consistent and dependable formative and summative assessment practices contribute to building whole-staff capacity by sharing their expertise
LEADERSHIP AND MANAGEMENT	Leading learning and teaching	School leaders: promote a culture of improvement, collaboration, innovation and creativity in learning, teaching and assessment foster a commitment to inclusion, equality of opportunity and the holistic development of each student manage the planning and implementation of the school curriculum foster teacher professional development that enriches teachers' and students' learning
	Managing the organisation	School leaders: establish an orderly, secure and healthy learning environment, and maintain it through effective communication manage the school's human, physical and financial resources so as to create and maintain a learning organisation manage challenging and complex situations in a manner that demonstrates equality, fairness and justice develop and implement a system to promote professional responsibility and accountability
	Leading school development	School leaders: communicate the guiding vision for the school and lead its realisation lead the school's engagement in a continuous process of self-evaluation build and maintain relationships with parents, with other schools, and with the wider community manage, lead and mediate change to respond to the evolving needs of the school and to changes in education
	Developing leadership capacity	School leaders: critique their practice as leaders and develop their understanding of effective and sustainable leadership empower staff to take on and carry out leadership roles promote and facilitate the development of student voice, student participation, and student leadership build professional networks with other school leaders
